Hydraulic cylinders of combine harvesters

Runhe Hydraulic's combine harvester hydraulic cylinders are professional agricultural hydraulic components with high load-bearing capacity and anti-vibration performance. Precision-welded, corrosion-resistant and low-leakage, they deliver stable, fast response for harvest operations. Customizable strokes fit all harvester models, boasting long service life to adapt to harsh farm working conditions and OEM/ODM support is available.

Product Basic Information

Item	Specification
Bore Size	40/50/63/80/100/125 mm
Rod Size	25/30/40/50/63/80 mm
Stroke	50-1000 mm (Support customized non-standard itineraries)
Working Pressure	16-25 MPa
Structure	Welded Type
Cylinder Barrel	45#
Piston Rod	40Cr
Mounting Type	Clevis/CA/Flange

Note: If you require other specifications of hydraulic cylinders, please contact us.

Product Advantages

Runhe's combine harvester hydraulic cylinders excel in anti-vibration & high load capacity, tailored for harsh farm work. Precision welding, imported seals and hard chrome plating ensure low leakage, corrosion resistance and long service life. Customizable specs fit all harvester models, with OEM/ODM support, stable performance and easy installation for efficient agricultural operations.
