Runhe hydraulic cylinders are compatible with boom cylinders and bucket cylinders of various brands of excavators.

Our hydraulic cylinders are processed with advanced CNC machine tools and automated electroplating spraying equipment to ensure that the surface roughness of each component of the hydraulic cylinder is low, the design is durable, and the performance is excellent. The advanced special buffer device with independent intellectual property rights can effectively absorb impact and protect the hydraulic cylinder to work smoothly and reliably. It is widely used in industries including agriculture, industry, mining, engineering, and municipal administration. We provide OEM, ODM, and OBM customization services. We have a large inventory of excavator hydraulic cylinders that are fully compatible with major brands. Customers can place orders at any time and we can deliver at any time. At the same time, we can also customize special hydraulic cylinders according to customer needs. We accept small batch customization orders.

Product Basic Information

Item	Specification
Application Model	Kubota Excavators: 15 20 135 155 161 165 175 183/185 JCM Excavators: JCM907 GC88 JCM913 GC138 JCM921 JCM922 JCM908 Yuchai Excavators: Yuchai35 Yuchai60-6/7 Yuchai60-8 Yuchai85-6 Yuchai85-8 Sunward Excavators: SWE80 SWE90 SWE150 SWE210 SWE230 SWE470 SWE50 SWE60/70 XGMA Excavators: XG806 XG808 XG822 XG825 XG836 Zoomlion Excavators: ZE150 ZE205 ZE230 ZE210 ZE260 ZE360 ZE330 ZE335 Sinomach Excavators: 335 KYM Excavators: 60 70 SDLG Excavators: E60 E65 E80 E85 E150 Yanmar Excavators: 55 Pengpu Excavators: SW210 JCB Excavators: JCB220 JCB330 JCB360 IHI Excavators: 55 60 Liebherr Excavators: 944 Takeuchi Excavators: 160 175 Samsung Excavators: MX6
Cylinder Type	Boom Cylinder, Stick Cylinder, Bucket Cylinder
Bore Diameter	Standard(Compatible with the corresponding excavator model)
Rod Diameter	Standard(Compatible with the corresponding excavator model)

HEBEI RUNHE HYDRAULIC MACHINERY CO., LTD

Add: No.27 Zhonghua North Street, Xinhua District, Shijiazhuang City,

Stroke Length	Standard(Compatible with the corresponding excavator model)
Working Pressure	Standard(Compatible with the corresponding excavator model)
Sealing System	Imported NOK Seals (Zero Leakage)
Material	45# High-Strength Steel (Cylinder Barrel) / 40Cr Hard Chrome Plated Rod

Note: If you need other brands of hydraulic cylinder, please contact us

Hydraulic cylinder Overview

Component	Description
Piston	Steel
Seals	Prevent leakage between the piston and barrel
Ports	NPT,NPTF&SAE is available.
Piston Rod	Hard chrome plated
Rod Gland	Ductile iron
Mounting Style	Clevis, Trunnion, Flange and so on

Product Advantages

Runhe Hydraulic delivers high-performance hydraulic cylinders tailored for Daewoo excavators, spanning boom, arm and bucket types. Engineered to OEM standards with premium high-strength steel and imported sealing kits, they ensure flawless compatibility, robust durability and permanent zero leakage. Backed by stringent QC protocols and worldwide after-sales service, our products are export-optimized for stable operation in harsh construction and mining environments.
