Lonking excavator hydraulic cylinders Boom cylinder Arm cylinder Bucket cylinder

Our hydraulic cylinders are processed with advanced CNC machine tools and automated electroplating spraying equipment to ensure that the surface roughness of each component of the hydraulic cylinder is low, the design is durable, and the performance is excellent. The advanced special buffer device with independent intellectual property rights can effectively absorb impact and protect the hydraulic cylinder to work smoothly and reliably. It is widely used in industries including agriculture, industry, mining, engineering, and municipal administration. We provide OEM, ODM, and OBM customization services. We have a large inventory of excavator hydraulic cylinders that are fully compatible with major brands. Customers can place orders at any time and we can deliver at any time. At the same time, we can also customize special hydraulic cylinders according to customer needs. We accept small batch customization orders.

Product Basic Information

Item	Specification
Application Model	Lonking excavators (Boom cylinder Arm cylinder Bucket cylinder) 60 75 90 150 225 280 360
Cylinder Type	Boom Cylinder, Stick Cylinder, Bucket Cylinder
Bore Diameter	Standard(Compatible with the corresponding excavator model)
Rod Diameter	Standard(Compatible with the corresponding excavator model)
Stroke Length	Standard(Compatible with the corresponding excavator model)
Working Pressure	Standard(Compatible with the corresponding excavator model)
Sealing System	Imported NOK Seals (Zero Leakage)
Material	45# High-Strength Steel (Cylinder Barrel) / 40Cr Hard Chrome Plated Rod

Note: If you need other brands of hydraulic cylinder, please contact us

Hydraulic cylinder Overview

Component	Description
Piston	Steel
Seals	Prevent leakage between the piston and barrel
Ports	NPT,NPTF&SAE is available.
Piston Rod	Hard chrome plated
Rod Gland	Ductile iron
Mounting Style	Clevis, Trunnion, Flange and so on

Product Advantages

Runhe Hydraulic delivers high-performance hydraulic cylinders tailored for Daewoo excavators, spanning boom, arm and bucket types. Engineered to OEM standards with premium high-strength steel and imported sealing kits, they ensure flawless compatibility, robust durability and permanent zero leakage. Backed by stringent QC protocols and worldwide after-sales service, our products are export-optimized for stable operation in harsh construction and mining environments.
