Jonyang Hydraulic Cylinder

We produce hydraulic cylinders that are fully compatible with all models of Jonyang excavators. The reason why it is fully compatible is that the appearance shape, material, size, connection method and performance of the hydraulic cylinder provided by us are completely consistent with the original hydraulic cylinder of the corresponding model Jonyang excavator. It works perfectly with Jonyang excavators.

Fully Compatible With Some Models

Fit for Brand	Model
Jonyang	210

Note: If you need other brands of hydraulic cylinder, please contact us.

Hydraulic Cylinder Overview

Component	Description
Piston	Steel
Seals	Prevent leakage between the piston and barrel
Ports	NPT,NPTF&SAE is available.
Piston Rod	Hard chrome plated
Rod Gland	Ductile iron
Mounting Style	Clevis, Trunnion, Flange and so on

Product characteristics

1. Safer

With excellent structural design and new material application, Runhe hydraulic cylinder can withstand the harshest working conditions, continue to work steadily and continue to open, to ensure the safety of drivers and vehicles, and to create the most valuable safety for users.

2. Unload quickly

Runhe hydraulic cylinder adopts excellent structural design to improve the unloading speed of the cylinder!

3. Stabilize

Runhe hydraulic cylinder lift frequency is high, it is suitable for all-weather short barge and high-frequency operation, stable performance, very low failure rate!

Company profile

Hebei Runhe Hydraulic Machinery Co., Ltd. use advanced CNC machine tools and automatic plating and spraying equipment for processing to ensure that all parts of the hydraulic cylinder have a low surface roughness and a high level of performance. The advanced special buffer device with independent intellectual property rights can effectively absorb shock and protect the smooth and reliable work of the hydraulic cylinder.

Our hydraulic cylinders are designed to be durable, can withstand a variety of harsh working conditions, it is widely used in including agriculture, industry, mining, engineering, municipal and other industries.

We provide OEM, ODM and OBM customized services, we have a large number of fully compatible with major brands of excavator hydraulic cylinder stock, we can do customers at any time to place orders, we are ready to deliver. At the same time, we can also customize special hydraulic cylinders according to customer needs, we accept small batch customized orders.

RUNHE HYDRAULIC CORE ADVANTAGES

With the established policy of integrating various information technologies and resources in an orderly and step-by-step manner, RunHe hydraulic provides hydraulic cylinder quality competitiveness by relying on advanced production and processing equipment !
