Seeder hydraulic cylinder

Runhe Hydraulics' hydraulic cylinders for planters are professionally engineered for agricultural working conditions. Featuring anti-vibration and corrosion resistance, they deliver stable thrust and smooth telescopic movement, with precise positioning performance. Fully compatible with various planter models, they effectively improve seeding accuracy and efficiency, providing durable and reliable hydraulic support for agricultural mechanization and intelligent farming.

Product Basic Information

Item	Specification
Bore Size	40/50/63/80/100 mm
Rod Size	20/25/35/45/63 mm
Stroke	50-1000 mm (Support customized non-standard itineraries)
Working Pressure	16-25 MPa
Installation method	Earrings / Pins / Flanges
Cylinder Barrel	45#
Piston Rod	40Cr
Seal	Nitrile rubber / Polyurethane

Note: If you require other specifications of hydraulic cylinders, please contact us.

Product Advantages

Runhe Hydraulics' planter hydraulic cylinders boast agricultural-specific advantages: anti-vibration & corrosion-resistant construction for harsh farm conditions, stable thrust and smooth telescoping for precise seeding positioning. Adopt imported high-quality seals and hard chrome-plated piston rods for long service life, fully compatible with various planter models, reliable performance to boost seeding efficiency and stability.
